YOUR FINGERTIPS**

Expect more from the stylish  
EPSON IR-700 with its high  
performance, speed and flexibility.

POS Terminal  
EPSON  
IR-700

The EPSON IR-700 is the all-in-one POS terminal with a compact design and improved performance. It is the powerful successor to the IR-320. Continuing with the outstanding expandability in an integrated concept, EPSON IR-700 offers even more flexibility through an increased number of peripherals and options that suit your requirements.

- Stylish and compact design
- Powerful and upgradeable
- User-friendly touch panel
- Flexible printing and easy operation
- Various flexible options
- Expandability
- Easy maintenance

Easy drop-in paper load

Simple to maintain

Built-in Magnetic Strip Reader

## Stylish and Compact Design

The EPSON IR-700 boasts an attractive contemporary design that complements any store environment. Its small footprint makes the EPSON IR-700 fit snugly on your counter, freeing up valuable counter space. Cable connections are also inset behind the system and maintain a neat appearance, saving even more space. Furthermore, the EPSON IR-700 can be installed either horizontally or vertically to fit any store space. With its outstanding flexibility and compactness, the EPSON IR-700 dramatically improves your communication with the customer and your store operation.

## Powerful and Upgradeable

The EPSON IR-700's powerful Celeron® M or Pentium® M processor lets you take advantage of the latest applications and functions, and it offers a smooth operation without any frustration. To increase processing capabilities even further you can add up to 1 GB of DIMM. Not forgetting the freedom to customise your own system as well as having the device to be specifically built to best suit your business. All these flexible and high quality features of the EPSON IR-700 ensure you get fast and easy checkouts every time.

## User-Friendly Touch Panel

The EPSON IR-700's large display is easily readable thanks to the TFT screen, and you can choose between a 12.1" or 15.0" touch panel. Its high performance touch panel is incredibly easy to use, reducing inputting errors, training time and costs.

## Flexible Printing and Easy Operation

You can choose either the standard thermal receipt printer or another printer to meet your needs. The thermal receipt printer offers high speed printing and convenient drop-in paper loading. If you attach the optional printer tray for EPSON TM-T90/L90, both receipt and label printing are available in one printer. There's also an optional dummy printer cover, which lets you use other Epson TM series printers.

## Various and Flexible Options

A wide range of options are available for customising your system. These include an MSR unit, a 28-key or 60-key keyboard unit, and a selection of customer displays. These options allow you to upgrade your system easily and to customise it freely to meet your needs.

## Expandability

There's a wide range of interfaces including serial, parallel, USB, Powered USB (option) and Ethernet or Wireless LAN (option), giving you maximum flexibility in your choice of hardware, software and peripherals to expand your system as desired. All you have to do is connect your new system to your network and it's ready to go.

## Easy Maintenance

It is very easy to replace or access devices such as the motherboard, HDD, LCD, and printer. Thanks to their pull-out features, you can service each device quickly and easily, without having to reconstruct any part of the machine. Its built-in diagnostic system also helps troubleshoot should a problem arise. So downtime is reduced at the store and you can also save on maintenance costs.
